PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience designing and shipping production-grade AI systems. Specialized in integrating **LLMs into customer-facing products**, building scalable backend services, and optimizing systems for latency, reliability, and token cost efficiency. Strong foundation in **Python, C#, TypeScript, and cloud-native architectures (Azure/GCP)**, with experience owning features end-to-end from design to production telemetry.

EXPERIENCE

RS Technologies Inc Dec 2025 – Present

Software Engineer | Remote

- Led design and delivery of enterprise LLM-powered productivity features, translating ambiguous user requirements into production-ready systems meeting latency and token cost targets.
- Architected full-stack solutions using **React/TypeScript and .NET microservices**, eliminating manual workflows and improving operational efficiency for cross-functional teams.
- Designed and deployed **Python and C# REST APIs**, reducing data retrieval latency by **40%** for downstream natural language query pipelines.
- Implemented telemetry-driven monitoring using **Azure Monitor**, identifying prompt regressions and service bottlenecks to improve production reliability.
- Contributed to architectural decisions around RAG pipelines, model orchestration, and structured prompt evaluation frameworks.

Tekly Studio LLC (Crypt0nest.io) Aug 2025 – Nov 2025

Software Engineer (Contract) | Remote

- Built and launched a production AI trading platform using **FastAPI and React**, supporting real-time inference workloads exceeding **500+ events/sec**.
- Designed structured prompt evaluation datasets to systematically improve response relevance, factual consistency, and output clarity across defined scenarios.
- Optimized RAG architecture to reduce token consumption while maintaining sub-second inference latency.
- Orchestrated containerized CI/CD pipelines on **GCP**, enabling safe experimentation and rapid deployment cycles.

Community Dreams Foundation Jan 2025 – Jul 2025

Software Engineer (Contract) | Remote

- Architected a unified Azure-based data integration layer consolidating multiple third-party systems into a scalable service architecture.
- Delivered real-time dashboards improving organizational visibility into program metrics and operational KPIs.

Cognizant Technology Solutions Jun 2021 – Aug 2023

Programmer Analyst | Hyderabad, India

- Developed high-availability backend services using **C# and Java**, integrating 20+ legacy enterprise systems into scalable production environments.
- Built monitoring and alerting pipelines to proactively detect performance bottlenecks and improve system reliability.
- Contributed to system design documentation, peer code reviews, and cross-team architectural discussions.

PROJECTS & OPEN SOURCE

LangChain Core Contributor GitHub PR #34424

- Resolved API inconsistencies within the core library and defined evaluation criteria to ensure consistent model behavior across multiple LLM providers.

AI Productivity Agents (Azure OpenAI + Semantic Kernel)

- Designed and implemented autonomous agents using **Semantic Kernel (C#)** capable of transforming Word, Excel, and PDF documents via natural language workflows.
- Built task-specific evaluation metrics to measure structured data extraction accuracy from unstructured enterprise documents.

TECHNICAL SKILLS

- Languages:** C#, Python, TypeScript, Java, SQL, JavaScript (ES6+)
- AI & LLM Systems:** Azure OpenAI, Semantic Kernel, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Evaluation, Agentic Workflows
- Frameworks:** .NET Core, FastAPI, React, Next.js, Node.js
- Infrastructure:** Azure (Monitor, Functions, App Services), GCP, AWS, PostgreSQL, Redis, Kafka, Docker, Kubernetes, Terraform, CI/CD

EDUCATION

Master of Professional Studies in Data Sciences Dec 2024

University at Buffalo, New York

Bachelor of Engineering in Computer Science May 2022

Sri Chandrasekharendra Saraswathi Viswa Maha Vidhyalaya, India
