

Sai Srikar Boddupalli

📍 New York, NY 📞 (716) 986-4873 ✉️ saisrikarboddupalli@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building and maintaining integration pipelines, RESTful APIs, and data exchange systems across **healthcare and financial technology** domains. Hands-on background in **Java, Spring Boot, Python, and SQL**, with a strong track record of troubleshooting complex production issues, enforcing **HIPAA-compliant** data handling, and delivering reliable integrations between enterprise systems and third-party platforms. Experienced collaborating across cross-functional teams to translate technical requirements into production-grade solutions with meticulous documentation and knowledge transfer.

EXPERIENCE

RS Technologies Inc Dec 2025 – Present

Software Engineer | Remote

- Designed, maintained, and debugged end-to-end **Java (Spring Boot) and Python** integration pipelines, ensuring reliable data flow between internal systems and downstream consumers.
- Built and exposed **Spring Boot REST APIs** consumed by internal services and third-party vendors, standardizing data exchange across heterogeneous enterprise systems.
- Performed root cause analysis on pipeline and integration failures, implementing **automated validation checks** to reduce ingestion errors and improve production uptime.
- Authored and maintained technical specifications, data dictionaries, and integration runbooks supporting enterprise-wide **data governance** and recurring upgrade cycles.
- Collaborated with cross-functional stakeholders to align system architecture decisions with strategic business workflows and reporting requirements.

Tekly Studio LLC Jan 2025 – Nov 2025

Software Engineer (Contract) | Remote

- Built real-time data ingestion pipelines via **Python REST APIs**, integrating with external platforms to enable continuous data availability for downstream systems.
- Integrated **AI/LLM tools (Claude)** into internal workflows to automate structured data extraction, tagging, and classification at scale.
- Designed and optimized **multi-tenant SQL Server** database schemas to support high-frequency writes and concurrent analytical queries across client environments.
- Delivered **end-to-end integration testing, environment configuration, and deployment** across development and production systems, maintaining data consistency and reliability.

SelectFi Aug 2024 – Dec 2024

Software Engineer | Buffalo, NY

- Built and maintained **Spring Boot** integration services connecting internal credit risk systems with **external lending partner APIs**, enabling automated real-time data exchange across the loan origination workflow.
- Managed complex **financial data logic in SQL** within a regulated fintech environment, ensuring strict data integrity, traceability, and **audit compliance**.
- Debugged and resolved production issues in multi-system integration environments, performing root cause analysis and implementing targeted fixes under time constraints.
- Produced high-quality structured datasets through normalization and validation, supporting downstream analytical and decisioning systems.

University at Buffalo Sep 2023 – Jul 2024

Graduate Research Engineer | Buffalo, NY

- Designed and maintained internal data pipelines to ingest, transform, and evaluate large-scale research datasets under strict academic delivery timelines.
- Documented technical methodologies and maintained reproducible code artifacts contributing directly to research publication outcomes.

Cognizant Technology Solutions Jun 2021 – Aug 2023

Programmer Analyst – Healthcare Integration | Hyderabad, India

- Developed and maintained enterprise-grade **ETL/ELT integration pipelines** for large-scale **healthcare data exchange** using Informatica PowerCenter, Talend, and Azure Data Factory, supporting interoperability across clinical and operational systems.
- Worked with healthcare interoperability standards including **HL7, FHIR, CCDA, and X12** in the context of clinical data exchange, interface design, and source-to-target mapping for enterprise health systems.
- Enforced **HIPAA-compliant** data handling standards across the full integration lifecycle – from source-to-target mapping and data profiling to validation, migration, and reconciliation.
- Designed and optimized complex **SQL queries, stored procedures, and relational data models** in Microsoft SQL Server to support data warehouse loads and downstream reporting.
- Supported **production incident response**, performed root cause analysis, coordinated scheduled system upgrades, and led cross-team knowledge transfer for critical healthcare integration components.

TECHNICAL SKILLS

- Languages & Frameworks:** Java, Spring Boot, Python, SQL, C#, JavaScript
- Integration & APIs:** RESTful Web Services, Spring Boot REST APIs, ETL/ELT Pipelines, Data Integration, Informatica PowerCenter, Talend, Azure Data Factory (ADF), LLM/AI Integration (Claude)
- Databases:** Microsoft SQL Server, Schema Design, Query Optimization, Stored Procedures
- Cloud & Tools:** Microsoft Azure, Git, IntelliJ IDEA, Visual Studio
- Healthcare & Compliance:** HL7, FHIR, CCDA, X12, HIPAA-Compliant Systems, Healthcare Data Integration, Audit-Ready Documentation, Data Governance

EDUCATION

Master of Professional Sciences, Computer Information Sciences *University at Buffalo, State University of New York*
Bachelor of Engineering, Computer Science *Sri Chandrasekharendra Saraswathi Viswa Maha Vidhyalaya, India*
